Hi Amer & Mohammad, kindly find below update and release notes for KSA4SALE project. Next release will be shared in 2 to 3 weeks period and all feedback will be address in coming weeks for below release side by side. Feel free to share your thoughts on it and if you find any error or fault in release kindly do share it with me as at the end of day we all are humans and do mistakes and by identifying them we can make this project successful with a combined effort InshaAllah.

Website Frontend Pages Update:

New Features

Modern Landing Page Design: Introduced a responsive layout optimized for both mobile and desktop users.

<https://floralwhite-lapwing-538069.hostingersite.com/>

Feature Ads: Here, I am dynamically fetching and displaying data based on the ID of a specific **card**.

<https://floralwhitelapwing-538069.hostingersite.com/routes/A2WUXTUIjhEJhieuG8gW>

Automative: This page provides details for automotive items, such as engine number, model number, color, and more.

<https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=eXm5dHyriO6w3hnqp05Z&callingFrom=automotive>

RealEstate: This page provides details for real estate, including flats, rooms, etc., with data based on the card ID.

<https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=AKUfDv3MkotP0c8ivlHP&callingFrom=RealEstate>

Electronic: <https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=0Vs7lwFHZ8VfDYJPBAvs&callingFrom=Electronic>

Health Care: This page provides detailed information about health care services, including hospitals, clinics, and wellness facilities, tailored to the selected card ID.

<https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=FyHuApZyn3JUg444HZav&callingFrom=HealthCare>

Sports and Games: This page showcases details about sports and games, including equipment, facilities, and activities, customized according to the selected card ID.

<https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=2Q6bMUoLMQButpJxB8QI&callingFrom=GamesSport>

Comercial Ads: This page provides detailed information about commercial ads, including products and services, tailored to the selected card ID.

<https://floralwhite-lapwing-538069.hostingersite.com/car-details?id=6cvIDLp5tHijORmS4r2N&callingFrom=ComercialsAds>

- **Dynamic Data Integration:**
 - All homepage cards now display dynamic data fetched from the backend.
 - Added support for filtering and sorting data dynamically.
- **Detail Page:**
 - Developed a responsive detail page with dynamically rendered data.
 - Integrated an image gallery for product views.
- **Navbar Enhancements:**
 - Added forms for **Sign In**, **Sign Up**, and **Listing**.

✖ Improvements

- **Dynamic Data Enhancements:**
 - Improved error handling for missing or invalid data.
 - Ensured seamless dynamic updates across homepage cards and the detail page.
- **Loading Speed:** Optimized image sizes, incorporated lazy loading, and reduced JavaScript bundle size for faster performance.

🐛 Bug Fixes

- **Card Size Issue:** Fixed inconsistent card heights when adding new data. All cards now resize dynamically.
- **Backend Enhancements:**
 - Improved data fetching logic by incorporating ID-based queries.
 - Resolved errors related to invalid or missing data in API responses.

Admin Panel Dashboard Overview:

Link: <https://ksa4salea-dmin.vercel.app/>

Username: Admin

Password: Admin

The Admin Panel is designed to provide a sleek, efficient, and user-friendly interface for administrators to manage and monitor various aspects of the platform. This panel is presented in a Night Mode theme to ensure a modern and comfortable user experience, especially during extended usage. The designs are minimalistic yet highly functional, offering a professional feel with a focus on usability.

1. Login Design

Link: <https://ksa4salea-dmin.vercel.app/>

Clean and Simple Layout: The login form is centered on the screen with a username and password input field, ensuring ease of access without unnecessary clutter.

Login Button: A vibrant, easily distinguishable button to initiate the login action.

Messages Design: Separate sections to view incoming and outgoing messages, with a clean, organized display.

Notifications: Keep administrators informed about platform activities, alerts, or system messages.

Real-Time Notifications: Notifications are displayed in real-time, alerting the admin about important events such as user activity, system issues, or updates.

Night View Theme: Dark Accents: Soft dark gray and black backgrounds with soft color highlights for buttons, charts, and icons make the interface visually appealing without being overwhelming.

2. Dashboard Design

Link: <https://ksa4salea-dmin.vercel.app/admin>

Provide a quick overview of essential platform metrics for administrators. The Dashboard serves as the central hub, providing administrators with at-a-glance information about the overall performance of the platform. It features real-time statistics displayed in visually appealing, easy-to-understand cards and graphs.

Total Users: Displays the total number of users registered on the platform. This metric helps the admin gauge platform growth and user engagement.

Total Products: Shows the total number of products available on the platform, allowing admins to track the inventory or catalog size.

Total Views: Reflects the total number of views across the platform. This metric could be applied to products, content, or pages depending on the platform type.

Total Profit: Provides a snapshot of the platform's profit, helping admins understand overall financial performance.

Total Revenue: Displays the total revenue generated, including sales, subscriptions, or other income sources.

3. Listings Page Design

Link: <https://ksa4salea-dmin.vercel.app/Listings>

All Listings: Displays a complete list of all listings submitted to the platform, including those that are pending, approved, or rejected.

Search and Filter Options: Admins can filter listings based on their status (Pending, Approved, Rejected) or search for specific listings using keywords, category, or other relevant criteria.

Details Display: Each listing includes important information such as listing ID, title, description, category, status, and date of submission. Admins can click on individual listings for more details or further actions.

Batch Actions: Option to apply actions to multiple listings at once, such as approving or rejecting, making the process more efficient for bulk operations.

Pagination/Scroll: Listings are organized into manageable pages or infinite scroll to avoid overwhelming the user with a large number of listings at once.

Pending Listings: Displays a list of listings that are in the "Pending" state, awaiting review and approval by the admin.

Approved Listings: Displays a list of all listings that have been approved and are currently live or visible on the platform.

Rejected Listings: Overview: Displays a list of all listings that were rejected during the review process, along with reasons for rejection, if provided.

4. Categories Page Design

Link: <https://ksa4salea-dmin.vercel.app/Categories>

Displays a list of all existing categories on the platform. Admins can see the category name, a short description, and the number of items (e.g., products or services) assigned to each category.

5. Sub Categories Page Design

Link: <https://ksa4salea-dmin.vercel.app/SubCategories>

Displays a list of all subcategories within a selected primary category. Admins can view the subcategory name, the parent category, a brief description, and the number of items (e.g., products, services) assigned to each subcategory.

6. User Profiles Page Design

Link: <https://ksa4salea-dmin.vercel.app/profile>

Admins can view detailed information about a user's account, including their name, email, profile picture, registration date, last login, and account status (active/inactive).

7. Blog Categories Page Design

Link: <https://ksa4salea-dmin.vercel.app/Blogs>

Displays a comprehensive list of all the blog categories currently available on the platform. Admins can view the category name, description, and the number of blog posts assigned to each category.

Search and Filter Options: Admins can easily search for specific blog categories by name or filter them based on the number of blog posts, making the process of managing large sets of categories more efficient.

Sort Options: Categories can be sorted by name, creation date, or the number of posts in the category, helping admins quickly find the most relevant categories to manage.

Category Actions: For each category, admins can perform actions such as editing, viewing associated blog posts, or deleting the category if it is no longer needed.

8. Reviews Page Design

Link: <https://ksa4salea-dmin.vercel.app/forms/form-elements>

This section displays a list of all reviews submitted by users on the platform. Each review will show the following information:

Review Title: The title given to the review by the user.

Review Content: The detailed text of the review.

Rating: The star rating (e.g., 1-5 stars) given by the user.

Reviewer Information: The reviewer's username, profile picture, and account status.

Review Status: The current status of the review (approved, pending, rejected).

Associated Product/Service: The product or service the review is associated with.

9. Memberships Page Design

Link: <https://ksa4salea-dmin.vercel.app/Membership>

Provide administrators with the ability to manage membership plans, monitor subscriber activity, and control member access and privileges on the platform. The Memberships Page serves as the hub for organizing and managing different membership levels, ensuring members are appropriately classified and that the platform's subscription system works seamlessly.

The Memberships Page is designed to allow admins to create, update, and manage different membership plans, set subscription prices, and view the active members under each plan. Additionally, admins can monitor the membership statuses and ensure that users have the proper privileges based on their membership level.

10. Settings Page Design

Link: <https://ksa4salea-dmin.vercel.app/settings>

Allow administrators to configure the platform's general settings, customize notifications, manage user roles and permissions, and handle essential

security features. The Settings Page serves as the control center for configuring the platform's operation, ensuring everything runs smoothly and securely.

The Settings Page is designed to centralize the key configurations required for the platform. It offers flexibility in managing platform-wide settings for everything from user experience to backend operations and security.

11. Home Page Listing Page Design

Link: <https://ksa4salea-dmin.vercel.app/GamesSport>

The Home Page Listing Page is designed to display a collection of items, products, services, or content in an organized and visually appealing manner. It should offer users easy access to browse, filter, and explore various listings while providing clear navigation to view more details.

The Home Page Listing Page acts as the first point of interaction for users with the listings available on the platform. It needs to be well-organized, aesthetically pleasing, and provide intuitive features that allow users to find what they're looking for quickly.

12. Transactions Page Design

Link: <https://ksa4salea-dmin.vercel.app/Transactions>

The Transactions Page is designed to provide admins with a comprehensive overview of all transactions on the platform. It allows administrators to track and manage payments, refunds, chargebacks, and any other financial activity between users and the platform. The page should be organized, easy to navigate, and provide detailed insights into each transaction.

13. Chats Page Design

Link: <https://ksa4salea-dmin.vercel.app/chart>

The Chats Page is designed to manage all chat interactions between users and the platform's admin or support team. It provides a real-time messaging system where admins can respond to user inquiries, resolve issues, and track communication history. This page should offer efficient management tools for monitoring and responding to customer messages promptly.

The Chats Page in the admin panel serves as a comprehensive tool for managing communication between users and the platform. With a well-organized layout, real-time messaging capabilities, quick reply options, and robust reporting tools, this page is designed to ensure that admins can handle user inquiries efficiently, provide high-quality support, and track chat interactions effectively.

By making the chat management process seamless and easy to navigate, admins can offer a better support experience, reducing response times, increasing user satisfaction, and ultimately ensuring smooth operations for the platform.
